1 Sample Proof

This document demonstrates the basic LaTeX setup for writing calculus proofs.

Theorem 1.1 (Derivative of a Constant). *If c is a constant, then $\frac{d}{dx}c = 0$.*

Proof. By the definition of derivative:

$$\frac{d}{dx}c = \lim_{h \rightarrow 0} \frac{c - c}{h} \tag{1}$$

$$= \lim_{h \rightarrow 0} \frac{0}{h} \tag{2}$$

$$= \lim_{h \rightarrow 0} 0 \tag{3}$$

$$= 0 \tag{4}$$

□

Example 1.2. Consider the function $f(x) = 5$. Then $f'(x) = 0$ for all $x \in \mathbb{R}$.
